

Side Marker Lamp — Rear

 [Ford Ecat Electronic Parts Catalog](#)

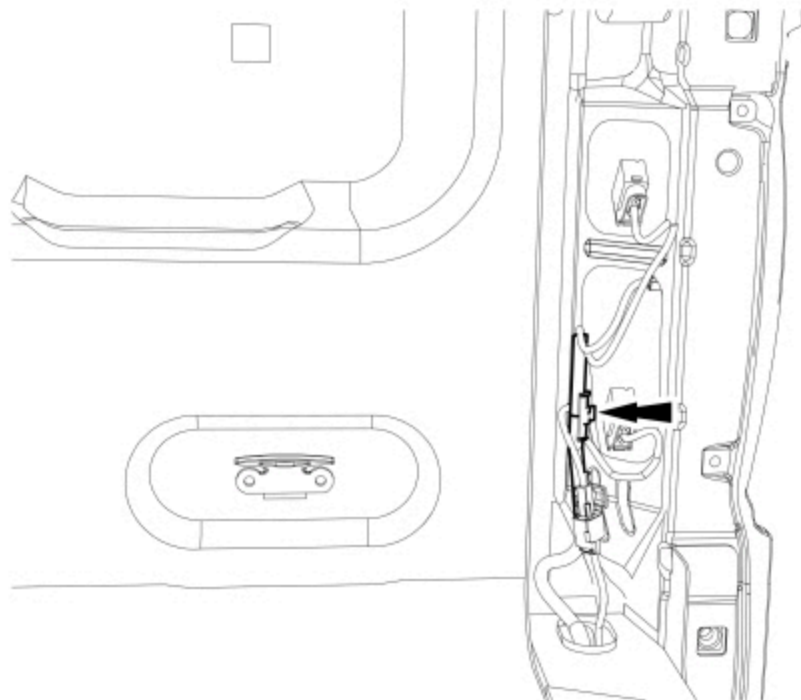

Item	Part Number	Description
1	—	Side lamp electrical connector (part of 13192)
2	13192 13192	Side LED lamp

Removal and Installation

1. Remove the rear lamp assembly. For additional information, refer to Rear Lamp Assembly in this section.
2. Disconnect the electrical connector and separate the LED connector push-pin from the vehicle harness.
3. Push the LED harness through the sheet metal and remove.
4. **NOTE:** Make sure the edge biter clip is attached to the outboard side of the sheet metal during installation.

NOTE: Edge biter clip must be retained so that the wire bundle is positioned behind the sheet metal.

To install, reverse the removal procedure.
